| **NOTES** |
|---|
| 1. AUD component values per-pax sourced from asal Costing R6-R27 (asal already broke down K&N transport into per-pax allocation by vehicle tier). |
| 2. CR tab Ground_Cost MYR = Total AUD × FX (cell B5 above). Hotel cost broken out separately for CNB deduction logic. |
| 3. Tipping AUD 100/pax bundled into Total per asal precedent — to break out separately, move to its own column in Costing-facing CR. |
| 4. Extrapolation pax 11-30: cost plateau at pax 10 values (conservative). Real K&N quote at 13+ pax uses 24-Seater (cheaper per-pax) — refresh as needed when quoting. |
| 5. Vehicle tiers (per asal CR/asal K column): pax 2-4 = 6-Seater, pax 5-12 = 12-Seater, pax 13-24 = 24-Seater, pax 25+ = 2x 12-Seater. |
| 6. ⚠ Margin at FX 3.00 + F2 disc RM 200: STD pax 2 CWB ≈ 0% (loss-leader). PREM pax 2 CWB ≈ 1.7% (critical). Quoter must reduce F2 disc OR accept loss-leader for pax 2 quotes. |
| 7. Catalog selling pax 11-30 extrapolated −RM50 per 5-pax block. CWB/CNB gaps preserve per-tier PDF anomalies (STD pax 4-5: Adult−300/Adult−600; PREM consistent Adult−200/Adult−400). |
| 8. Cross-check K&N CR PDF when quoting outside standard itinerary: airport midnight surcharge, Pinnacles add-on, extra-hour transport AUD 50/hour cash to driver. |
